Status: Signed
Editor: Diane M Vroenen, DO (Physician)

HISTORY OF PRESENT ILLNESS:

Tammy L Simpson is a 62y.o. female with chronic lower back and buttock pain. She has a history of an L4-5 fusion recent CT myelogram showed that the cages migrated she has follow-up with neurosurgery in the near future. She has had SI joint injections with her pain management doctor reported only mild improvement with that. She denies any significant radicular pain down her legs although she has a buttock pain and sometimes has an aching pain in her calves chronic numbness tingling top and bottom of both feet she reports feeling mostly at night.

ROS:

A 10 point review of systems was completed and was negative with exception of that included in the history of present illness.

Clinical Notes (continued)

PHYSICAL EXAM:

GENERAL
Patient is well-developed, in no acute distress. Affect is normal and appropriately engaged.

NEUROLOGIC
Mental Status: Oriented to person, place, and time. Good historian.
Cranial Nerves: Cranial nerve function is grossly intact bilaterally.
Gait: Gait reveals normal cadence and stride.
Muscle Tone: No increased tone
Strength: All the major muscles of the bilateral upper extremities 5 out of 5 and bilateral lower extremities 5 out of 5 on manual muscle strength testing.
Sensation: Normal light touch in all upper and lower extremity dermatomes.

PULMONARY
Respirations appear even and unlabored.

MUSCULOSKELETAL
Spine: Normal spine range of motion, no gross axial skeletal deformities.
Palpation: On inspection and palpation of the spine and upper and lower extremities are essentially unremarkable
Negative Fortin and Faber
Joint Range of Motion: The patient has full and pain free range of motion in major joints in the upper and lower extremities with no obvious instability or laxity. There are no gross appendicular deformities noted.
Acutely tender in the right greater than left gluteal area and along the left paraspinal muscles
Negative straight leg raise

Imaging: I reviewed all recent imaging, please see HPI.

Labs: I reviewed all recent lab results.

IMPRESSION, REPORT, AND PLAN:
62y.o. female with myofascial pain in the back and glutes. She has some abnormal findings on CT myelogram concerning her previous surgery has follow-up soon with neurosurgery. No radicular pain at this time. We discussed some soft tissue work for the glutes to see how much of that was her pain since she was so acutely tender in that area today. I would not want them to do anything with any significant pressure or manipulation for the lower back until cleared by neurosurgery. Will see what neurosurgery has to say about her CT myelogram and if EMG is indicated we can do that versus trigger point for the glutes if she is getting partial response to soft tissue work with physical therapy.

* This list has 2 medication(s) that are the same as other medications prescribed for you. Read the directions carefully, and ask your doctor or other care provider to review them with you.

We believe in information transparency, and we believe you deserve to see your information as soon as it is available. We believe this builds trust and better relationships.

We release ALL lab and imaging results to you via MyChart as soon as they are available. For culture results that become available after you leave the emergency department today, we have a process to follow up those results by reaching out to you when necessary to address them. If you see other results about which you have questions, please contact us at the emergency department number listed on this paper, or contact your primary care provider to discuss them.

A trusted description of many test results can be found at https://medlineplus.gov

After Visit Summary (continued)

Important Reminders Regarding Your Medications:

1. Keep a list of your current medications (including prescription, over-the-counter and herbal products) and give it to any healthcare provider you see.
2. If your prescription runs out of refills, request a refill from your pharmacy at least 3 business days before your medication is needed and they will send your provider a refill request to our computer. If that is not possible, you may request a refill through MyChart or phone the office.
3. If you do not understand when or how to take your medications or why you are taking them, please talk to your provider or pharmacist before you take the medication.
4. To avoid drug interactions, consult your provider or pharmacist if you plan to begin taking supplements or herbals.
