Patient:	**Kevin Malles**
Date of Birth:	03/11/2001
Current Gender:	Male
Date:	05/07/2026 11:15 AM
Historian:	self
Visit Type:	Office Visit

This 25 year old client presents for Est Care.

History of Present Illness

1. Est Care

Patient presents to establish care for persistent midline low back pain after a line-of-duty injury sustained during an Army PT test at the end of March, previously evaluated on 03/28 with lumbar X-rays reportedly without acute abnormality and diagnosed as acute midline low back pain without sciatica related to overexertion from sudden strenuous movement. Symptoms have persisted despite activity modification, ibuprofen, and cyclobenzaprine without meaningful relief. Pain remains localized to the midline lower back without clear lateralization or radicular features. Patient is motivated to proceed with appropriate evaluation and treatment in order to support return-to-duty requirements. He denies lower-extremity weakness, numbness, tingling, saddle anesthesia, bowel or bladder incontinence, urinary retention, fever, chills, unexplained weight loss, night sweats, abdominal pain, or other red flag symptoms. Education provided regarding likely mechanical low back injury, importance of maintaining gentle activity as tolerated, expected role of physical therapy in restoring body mechanics and function, and need for further imaging if symptoms persist or based on occupational requirements.

Screening Tools

Other Screenings

Encounter Date	Performed Date	Screening Tool	Score	Severity/ Interpretation	MDD Classification	Scanned Document
05/07/2026	05/07/2026	Patient Health Questionnaire (PHQ-9)	0			
05/07/2026	05/07/2026	Patient Health Questionnaire (PHQ-2)	0	Negative		

Patient Health Questionnaire

Performed Date: 05/07/2026

Over the last 2 weeks, how often have you been bothered by any of the following problems?

	Not at All	Several Days	More Than Half The Days	Nearly every Day
1. Little interest or pleasure in doing things	X			
2. Feeling down, depressed or hopeless	X			
3. Trouble falling or staying asleep, or sleeping too much				
4. Feeling tired or having little energy				
5. Poor appetite or overeating				
6. Feeling bad about yourself - or that you are a failure or have let yourself or your family down				
7. Trouble concentrating on things, such as reading the newspaper or watching television				
8. Moving or speaking so slowly that other people could have noticed. Or the opposite - being so fidgety or restless that you have been moving around a lot more than usual.				
9. Thoughts that you would be better off dead, or of hurting yourself in some way				

	Not Difficult at All	Some What Difficult	Very Difficult	Extremely Difficult
10. If you checked off any problems, how difficult have these problems made it for you to do your work, take care of things at home or get along with other people?				

Total score: Screening total score was 0.
Initial diagnosis: None.

Social History (Reviewed, updated)

Tobacco use reviewed.

Preferred language is English.

Marital Status/Family/Social Support

Marital status: Single

Tobacco use status: Chews tobacco.

Smoking status: Unknown if ever smoked.

Tobacco Screening

Patient has used tobacco. Patient has used tobacco in the last 30 days. Patient has not used smokeless tobacco in the last 30 days.

Smoking Status

Type	Smoking Status	Usage Per Day	Years Used	Pack Years	Total Pack Years
Chewing	Unknown if ever smoked				

Vaping Use

Screened for vaping? No

Tobacco/Vaping Exposure

No passive smoke exposure.

Alcohol

There is a history of alcohol use.
consumed occasionally.

Caffeine

The patient uses caffeine: coffee.

Lifestyle

Diet

healthy.

Confidential Information

Drug Use/Abuse

The patient denies illicit drug use.

Sexual Practices

Gender Identity is Choose not to disclose.

Sexual Orientation: Choose not to disclose.

Contraception - End of Visit

Birth control method at end of visit: condoms, male

Screening Summary

Pain is described as 0/10. Evaluated pain score with Numeric Pain Intensity Scale.
The following were reviewed: nutrition, tobacco use, alcohol use, caffeine use and drugs of abuse

Physical Exam

Exam	Findings	Details
General Exam	Comments	Lumbar spine with midline lower lumbar tenderness to palpation and mildly decreased range of motion secondary to pain. No focal neurologic deficit appreciated; gait grossly intact, and no objective findings of radiculopathy noted on exam.
Constitutional	Normal	Well developed.
Eyes	Normal	Conjunctiva - Right: Normal, Left: Normal. Pupil - Right: Normal, Left: Normal.
Ears	Normal	Inspection - Right: Normal, Left: Normal. Hearing - Right: Normal, Left: Normal.
Nose/Mouth/Throat	Normal	External nose - Normal. Lips/teeth/gums - Normal.
Neck Exam	Normal	Inspection - Normal.
Respiratory	Normal	Inspection - Normal. Effort - Normal.
Abdomen	Normal	Inspection - Normal. No abdominal tenderness.
Skin	Normal	Inspection - Normal.
Musculoskeletal	Normal	Visual overview of all four extremities is normal.
Neurological	Normal	Memory - Normal. Sensory - Normal.
Psychiatric	Normal	Orientation - Oriented to time, place, person & situation. Appropriate mood and affect.

Assessment/Plan

#	Detail Type	Description
1.	Assessment	Acute midline low back pain without sciatica (M54.50).
	Impression	Midline low back pain after overexertion injury during Army PT test; prior X-rays without abnormal findings; no sciatica described in prior assessment. - Order MRI lumbar spine - Refer to physical therapy.
	Patient Plan	Complete ordered MRI lumbar spine and begin physical therapy as scheduled. Continue ibuprofen and cyclobenzaprine only as previously directed if helpful; use heat, gentle stretching, and avoid heavy lifting or high-impact activity until reevaluated. Follow up in clinic in about 1 month or sooner to review MRI/PT progress and discuss return-to-duty status. Call clinic for worsening pain or trouble scheduling studies; go to ER for new leg weakness, numbness, saddle anesthesia, bowel/bladder changes, fever, or severe uncontrolled pain.
	Plan Orders	Ordered: MRI L-SPINE W/O CNT to be performed. MRI T-SPINE W/O CNT to be performed. Physical Medicine and Rehabilitation. Clinical information/comments: Persistent midline mechanical low back pain after line-of-duty overexertion injury in late March; prior lumbar X-rays reportedly negative; please evaluate body mechanics, pain control, mobility, and return-to-function program. .
2.	Assessment	Family planning counseling (Z30.09).
	Impression	We have discussed reproductive goals, including no desire to become pregnant within the next year. We have discussed healthy relationships and prevention of sexual coercion. Patient declines STI screening. All questions answered..
3.	Assessment	Dietary counseling and surveillance (Z71.3).
4.	Assessment	Exercise counseling (Z71.82).

5.	Assessment	Encounter for screening for depression (Z13.31).
6.	Assessment	Body mass index [BMI] 28.0-28.9, adult (Z68.28).
	Plan Orders	Completed/Result Received: Prescribed diet education. Clinical information/comments: healthy. Prescribed activity/exercise education.
7.	Other Orders	Orders not associated to today's assessments.
	Plan Orders	Completed/Result Received: Patient Health Questionnaire (PHQ-2). Interpretation: Negative, Result details: 0. Patient Health Questionnaire (PHQ-9). Result details: 0. SBIRT. Interpretation: Negative.
	Plan Orders	Ordered: HCV Rapid Test (POC) to be performed. Oraquick Rapid HIV 1/2 (POC) to be performed.
